

Lili's Series

Lili has series of numbers with these formula:

- F(0) = 1 and F(1) = 2
- F(n) = F(n-1) + n + F(n-2) + 1
- If n is multiple of 3, so formula is F(n-n/3)+1

Lili want to write the N-th number and total number of calls for F(3) and F(4) is used to create the N-th number.

Format Input

The first line contains an integer T stating the number of test cases. For each test case contains an integer N which indicate the N-th wants to display and total number from F(3) and F(4) is used to create the N-th number.

Format Output

Consists of T lines where each line has the format "Case #X:", where X is the test case number starting at 1. For each test case, output a single line containing 2 integers that are the Nth wants to display and total number from F(3) and F(4) is used to create the Nth number. Each integer is separated by a space.

Constraints

- $1 \le T \le 20$
- 0 < N < 150

Sample Output (standard output)

Case #1: 6 0
Case #2: 7 1
Case #3: 18 2
Case #4: 31 3
Case #5: 19 2

Note

Even though it is not stated explicitly, you should know by now that excessive space / newline are treated as **WRONG ANSWER**.

Lili's Series

Lili memiliki sebuah deret bilangan bulat X dengan formula sebagai berikut:

- F(0) = 1 and F(1) = 2
- F(n) = F(n-1) + n + F(n-2) + 1
- Jika n merupakan keliapatan 3, maka gunakan formula : F(n-n/3)+1

Lili mau menampilkan angka urutan ke N dan jumlah pemanggilan dari F(3) dan F(4) yang digunakan untuk membentuk angka ke N tersebut.

Format Input

Baris pertama berisi sebuah bilangan bulat T yang menyatakan banyaknya kasus uji. Setiap test case berisi 1 buah bilangan bulat N yang menyatakan nilai angka ke N dan jumlah hasil dari F(3) dan F(4) digunakan untuk membentuk angka ke N yang ingin ditampilkan.

Format Output

Terdiri dari T baris yang setiap barisnya memiliki format "Case # X:", dimana X adalah nomor kasus uji mulai dari 1. Setiap kasus uji, tampilkan satu baris yang berisi angka ke N dari formula yang dibentuk, serta jumlah hasil dari F(3) dan F(4) digunakan untuk membentuk angka tersebut. Setiap bilangan dipisahkan oleh spasi.

Constraints

- $1 \le T \le 20$
- 0 < N < 150
