

Divisor Sort

Bibi has always been fascinated by numbers. Currently, she is researching the correlation between a number and the sum of its divisors. A number K is a divisor of X if K fully divides X and leaves no remainder. The number 6 for example, has a sum of 12 which comes from 1+2+3+6. To speed up her research, she has asked your help as her programmer friend to help create a program that can sort an array of numbers A ascendingly based on the sum of its divisors. In case of a tie, she has asked you to output the smaller number before the larger number.

Format Input

A single line with an integer N denoting the number of elements followed by another line containing N elements denoting the numbers in the array.

Format Output

A single line with N elements separated by a single space denoting the sorted array satisfying Bibi's requirements.

Constraints

- $\bullet \ 1 \leq N \leq 10^3$
- $1 \le A_i \le 10^4$
- Each element in A does not appear more than once

Sample Input 1

5 1 13 6 7 2

Sample Output 1

1 2 7 6 13

Divisor Sort

Bibi selalu terpesona oleh angka. Saat ini, Ia sedang meneliti korelasi antara bilangan dan jumlah dari pembaginya. Angka K adalah pembagi dari X jika K membagi habis X dan tidak meninggalkan sisa. Angka 6 misalnya, memiliki jumlah pembagi 12 yang didapatkan dari 1+2+3+6. Untuk mempercepat penelitiannya, Ia telah meminta bantuanmu sebagai teman programmernya untuk membantu membuat program yang dapat mengurutkan deretan angka A menaik berdasarkan jumlah pembaginya. Jika ada angka yang memiliki jumlah pembagi yang sama, Ia memintamu untuk mengoutputkan angka yang lebih kecil terlebih dahulu.

Format Input

Satu baris berisi bilangan bulat N yang menyatakan banyaknya angka diikuti oleh satu baris berisi N buah bilangan yang menyatakan angka yang diberikan Bibi.

Format Output

Satu baris berisi N buah bilangan dipisahkan oleh spasi yang memenuhi persyaratan Bibi.

Constraints

- $\bullet \ 1 \leq N \leq 10^3$
- $1 < A_i < 10^4$
- \bullet Setiap elemen di A tidak muncul lebih dari sekali

Sample Input 1

5 1 13 6 7 2

Sample Output 1

1 2 7 6 13
